Q. Do you have Medicare Number?

=NO

Q. Do you have an Individual Healthcare Identifier?

=An Individual Healthcare Identifier (IHI) is a number that identifies you for health care purposes.

Q. How to get IHI?

=You can get an IHI online using the IHI service through myGov.

To do this, you'll need to provide details from one of these identity documents:

- Your passport, with a valid Australian visa
- Your Australian driver licence

We'll use these details to verify your identity and give you an IHI.

1. Go to my.gov.au and sign in.
2. Select services or link your first service.
3. Select IHI service from the list.
4. Follow the prompts.

If you don't have one of these identity documents, you can request an IHI using a form. This will take longer than requesting an IHI online.

You also need to provide other acceptable identity documents with your request.

Q. How to get your immunization history through the IHI service?

=You can use your IHI to link the IHI service to your myGov account. Once you've linked the IHI service, you can sign in to myGov to get your immunisation history statement.

1. Sign in to your myGov account.
2. Select the covid-19 vaccination status quick link.
3. Select your name, and then View immunisation history statement(pdf).
